

Aditya Pillai

Aditya.pillai1049@gmail.com | (608) 395-1622

EDUCATION

University of Wisconsin-Madison - B.S. Electrical Engineering

2025-Present

- Coursework: CS 200, CS 300, MATH 221/222, ECE 252/210, PHYS 201

APL Global School, Chennai - Cambridge AS/A Levels

2020-2025

- Relevant coursework: Mathematics, Computer Science, Physics, Chemistry

EXPERIENCE

Indian Institute of Technology Madras, Chennai - Student Intern

Jun 2024-Dec 2024

- Worked under Prof. Sivakumar on computational mechanics projects, including truss analysis using MATLAB and numerical methods. Developed an understanding of modeling physical systems through computational approaches.
- Completed Engineering Mechanics: Statics as part of internship preparation.

Cambridge Study Hub - Web Developer

Jun 2024-Jun 2025

- Built a resource website for A Level STEM subjects using a base template; added study tools and content.

Rotary Club of Madras, Chennai - Team Coordinator & Volunteer

- Led student volunteers for a cervical cancer vaccination program; managed consent form distribution and collection.

PROJECTS

LED Noise Meter - ECE 210

Feb 2026-Apr 2026

- Designed and implemented an Arduino-based sensing system to process analog acoustic signals and map them into real-time visual outputs, simulating basic signal processing workflows

UW-Madison Quantum Computing Club - Quantum Circuits (Python/Qiskit)

Sep 2025-Dec 2025

- Learned quantum mechanics fundamentals for computing (superposition, measurement, entanglement) through weekly workshops.
- Built and simulated gate-based circuits in Python (Qiskit); executed programs on IBM Quantum hardware via IBM's cloud interface.

Code Art Club (p5.js) - Interactive Simulations

Jun 2023-Dec 2023

- Built physics visualizations and games (e.g., Pong modeled with Newton's laws of motion).
- Created a bacterial asexual reproduction simulation; earned an A in the final assessment.

LEADERSHIP

School Assembly Seminar Lead - Computation Across Industries

Aug 2024-Oct 2024

- Led a seminar on computation applications across healthcare (AI diagnostics), energy (smart grids), and transportation (autonomous vehicles).
- Integrated real-world case studies from computational engineering research to support key points.

SKILLS: Programming: Python, Java, LC-3 Assembly, C++ (Arduino)
